## THE STORY

**LOGLINE:** A catholic man with Stage 4 cancer receives a miracle that defies modern medicine, along with strange lunar signs that predicted it. We journey with him six months later to follow up.

### SCRIPT EXCERPT:

**Open on a black screen...**

"Now faith is confidence in what we hope for and assurance about what we do not see."  
- Hebrews 11:1

Do you believe in miracles? It's a question as old as religion itself.

- The Bible talks about Jesus "feeding the five thousand" with just a few loaves and fish ... and of course, there are the charlatans, life coaches, and pseudo-scientists all offering "fast food enlightenment" over the course of a weekend, for a monetary donation.
- Anti-depressants and anti-anxiety meds are being prescribed at an all-time high.
- Therapists have never been busier.
- God is being taken out of the pledge of allegiance.
- The Federal government closed churches during COVID but allowed protests of all kinds.

Leading us to ask, "Where has our faith gone?"

**[View Investor Info](#)**

**Luis Villegas** is a man of extreme faith who was put to the test when he was diagnosed with Stage 4 bladder cancer. He was "passing blood for a few years" and he and his doctor chalked it up to "diabetes." Finally, he gets an MRI that shows a series of nine tumors and is referred to an oncologist for further diagnosis. Luis is told his cancers resemble a "coral reef" and there's little hope of recovery. Even in the midst of the diagnosis, his Bishop and others are blown away by his faith: "If I die I get to be with God, if I live I get to be with my wife ... either way, I'm good."

– Luis Villegas

"Ask a sign for yourself from the Lord your God; make it deep as Sheol or high as heaven."

– Isaiah 7:11

**Midpoint:** Luis goes outside after receiving the news and looks to the moon. Distraught Luis looks to the heavens and there in the moon is a beautiful cross. After rubbing his eyes, he calls his neighbor to come out and look at the moon. Theresa, his neighbor, comes out and confirms there is a cross on the moon. The next day, Luis, his wife, and the neighbors go to breakfast. As they're perusing the photo images, they notice something else ... a visage of the host, Jesus Christ. Shortly thereafter, Luis goes to see his Bishop, who tells him based on these visions, and his faith, that he will be healed of his nine tumors. Luis then goes into surgery for what is supposed to be a two-plus hour procedure. Instead, he is woken by his wife after just seventeen minutes under, and asks what happened?

The doctor then tells Luis that all of his tumors are gone! This November 2023, we will accompany Luis for his six-month follow-up. Why tell this story ... and why now?

**Simple.** Everywhere we turn, the narrative is fear and hopelessness. Fear of each other, terrorists, viruses, of 'words' spoken in anger. Hope was snuffed out by billionaire globalists, seeking compliant citizens who no longer speak up for what's right. Now is the time for miracles ... Villegas' miracle – to wake up the masses to the fact that there is hope and that the sun will rise for those who believe in the impossible. When's the last time you really looked inside yourself and asked, "Where's Your Faith?"

"By faith in the name of Jesus, this man whom you see and know was made strong. It is Jesus' name and the faith that comes through him that has completely healed him, as you can all see."

– Acts 3:16

## VISUAL FEEL

We will shoot this in 2:35:1 using Anamorphic Prime Lenses to feature all the powerful imagery that best illustrates the story. Framing will be specific, and run the gamut, always against a light source: from super tights to long shots to accentuate the subject's intentions.

The Camera will be an active participant. From POV to slider-establishing shots, **FAITH IN MIRACLES'** cinematic feel will stay with our audience long after the closing credits.
